

Preox Kevlar Trousers

Glass Industry - Industrial Upkeep

REF: DLP10/2XX/XX
(2XX = model, XX = size)
VERSION 02/2026

This personal protective equipment (PPE) adheres to EU Regulation 2016/425 and is under EU type certificate no. CER26/03/0023.C1 issued by TTS - Total Testing Services srl, a European notified body 2959. This personal protective equipment (PPE) has been validated through the MODULE D audit conducted by Quintin Certifications, a European notified body (2927). The EU Declaration of Conformity is available for download on our website: www.dl-equipement.fr

Guidelines and safety measures for utilization:

These work trousers, constructed from preox Kevlar fabric and featuring a 100% cotton Proban-treated terry lining, are designed for use in environments with moderate heat exposure.

Each time you don the DLP10/2xx/xx trousers, verify that they are free from tears or stains, as such damage can compromise their protective efficacy. These trousers must always be worn completely fastened and in conjunction with the DLV10/2xx/xx jacket to guarantee comprehensive body protection. The suspenders must be covered by the DLV10/2XX/XX jacket.

The trousers must always be paired with the jacket that meet or exceed the same performance standards as outlined in EN ISO 11612.

Protection limits:

The protection is uniform throughout the entire surface of the garment.

These trousers are unsuitable for use in work environments where there is a risk of molten material splashes; in such instances, it is imperative to wear a garment constructed from aluminized fabric to provide sufficient protection against these hazards.

The flame-retardant treatment of the lining is assured when the recommended washing instructions are adhered to. In the case of an accidental splash of a chemical or flammable liquid, the wearer must remove the trousers and verify that the liquid has not contacted the skin. The trousers should then be cleaned or taken out of service.

Packaging and Storage:

Item delivered in a shipping carton without additional packaging (no specific packaging required). It is recommended to store in a dry and clean location, away from light, to maintain the level of protection consistent with the conducted tests.

Maintenance and cleaning:

Cleaning by domestic washing in accordance with ISO 6330, with a maximum washing temperature of 40°C. Do not bleach - Do not tumble dry - Iron at 150°C (2 dots) - Do not dry clean. DL Equipement SARL is the sole authorized repairer of dlp10/2xx/xx trousers, ensuring the use of materials certified in the compliance file.

Recycling & Disposal: To our knowledge, the materials used in the manufacture of this item do not pose any specific hazards. Disposal or recycling of this garment can therefore be carried out in accordance with local best practices.

Made in France

EN ISO 13688:2013 + A1:2021
