QUALITY PROTECTION FOR HOT WORK

PREOX Aluminised Gaiters

Steelworks - Foundries - Glassworks

REF: DLG40/101/XX
(XX = size)

VERSION 10/2026

Gaiters made of Preox Alu 490 g/m², Proban cotton lining 340 g/m², hook-and-loop closure and Kevlar thread stitching.

Options: height and width of the gaiters.

This PPE complies with Regulation (EU) 2016/425 and has been granted EU type-examination certificate no. 033/2022/0414.02 issued by CENTEXBEL, Technologiepark 70 - 9052 Zwijnaarde GENT, European notified body 0493.
This PPE is verified by the MODULE D audit carried out by Quintin Certifications, European notified body 2927. EU Declaration of Conformity: available for download on our website: www.dl-equipement.fr (enter the product code, then the « Document » tab)

Instructions and precautions for use:
These gaiters made of aluminised fabric provide protection for the ankle and foot against high heat sources or small splashes of molten material. The materials used guarantee good protection against the risks of ignition.
Each time the dlg40/101/xx gaiters are used, check that they are neither torn nor dirty, as tears or soiling may reduce their protective performance.

Protection limits:
The protection is identical over the entire surface of the gaiters. The wearing of the gaiters must be supplemented by the wearing of PPE garments suited to the same risks in order to protect the rest of the body and guarantee the user the same level of protection.
These gaiters must only be used within the limits of the covered risks indicated above.
In the event of an accidental splash of a chemical or flammable liquid, the wearer must remove the gaiters and make sure that the liquids have not come into contact with the skin. The gaiters must then be cleaned or withdrawn from service.
In the event of splashes of molten material, the user must immediately leave the workplace and remove the gaiters to check their condition. In the event of splashes of molten material, if they are worn on the skin, the gaiters do not protect against all burn risks.

Packaging & storage:
Item delivered in a shipping carton without other packaging (no specific packaging required). Recommended storage in a dry & clean place, in order to maintain the level of protection corresponding to the tests carried out.

Made in France

Care, cleaning:
No cleaning recommended: the aluminised outer part may be cleaned with a sponge and water; do not use detergents or solvents.
DL Equipement SARL is the only company authorised to repair these gaiters, in order to guarantee the use of the materials certified in the conformity file.

Adverse effects & allergies: No cases to our knowledge.

Recycling & disposal: To our knowledge, the materials used in the manufacture of this item present no particular harmfulness; this garment may be disposed of or recycled in accordance with good practice.

EN ISO 13688 : 2013
EN ISO 11612 : 2015

EN ISO 11612

A1 B1 C3 D3 E3 F1

A1 - Limited flame spread (surface ignition)
B1 - Convective heat (Level 1 to 3)
C3 - Radiant heat (Level 1 to 4)
D3 - Molten aluminium splash (Level 1 to 3)
E3 - Molten iron splash (Level 1 to 3)
F1 - Contact heat (Level 1 to 3)

Year of manufacture: see label

It is advisable not to store this PPE for more than one year, as a deterioration in quality is always possible, which could possibly alter the level of protection.
