QUALITY PROTECTION FOR HOT WORK

AFLAMMIT® Marine

Glassworks

REF: DLM100/1XX/XX
(1XX = model type, XX = size)

VERSION 10/2026

Green marine made of 100% cotton terry fabric treated with AFLAMMIT®, hook-and-loop fastening.
Options: the length of the sleeves and of the marine, as well as the collar height, may vary according to the user's request. Fastening: collar with hook-and-loop or buttons, or hook-and-loop and/or press studs over the full height of the marine. Possibility of lower patch pockets with turn-ups, an inside pocket and/or a hood made of AFLAMMIT® terry loop fabric. The cuff may have a para-aramid rib knit or a simple hem. Embroidery of company logo or user's surname and first name.

This PPE complies with Regulation (EU) 2016/425 and has been granted EU type-examination certificate no. 033/2021/1291.02 issued by CENTEXBEL, Technologiepark 70 - 9052 Zwijnaarde GENT, European notified body 0493.
This PPE is verified by the MODULE D audit carried out by Quintin Certifications, European notified body 2927. EU Declaration of Conformity: available for download on our website: www.dl-equipement.fr (enter the product code, then the « Document » tab)

Instructions and precautions for use:
This garment, made of 100% cotton terry fabric treated with AFLAMMIT® and highly absorbent of perspiration, is intended to be worn when approaching areas of moderate heat and under garments made of aluminised fabric or other thermal protection. The AFLAMMIT® treatment guarantees excellent protection against the risks of ignition.
Each time the dlm100/1xx/xx marine is used, check that it is neither torn nor dirty, as tears or soiling may reduce its protective performance. This garment must always be worn fully closed.
In the event of an accidental splash of a chemical or flammable liquid, the wearer must remove the marine and make sure that the liquids have not come into contact with the skin.

Protection limits:
The protection is identical over the entire surface of the garment.
When used near a significant heat source or where there is a risk of molten material splashes, it is essential to wear a garment made of aluminised fabric over the marine in order to ensure protection suited to the risks.
The flame-retardant treatment is guaranteed provided the recommended washing instructions are followed.

Packaging & storage:
Item delivered in a shipping carton without other packaging (no specific packaging required). Recommended storage in a dry & clean place, in order to maintain the level of protection corresponding to the tests carried out.

Care, cleaning:
Domestic washing according to ISO 6330; the washing temperature must not exceed 40°C. Protective performance against heat and flame is guaranteed for up to 12 washes.
DL Equipement SARL is the only company authorised to repair the dlm100/1xx/xx marines, in order to guarantee the use of the materials certified in the conformity file.
If the garment has hook-and-loop fasteners, make sure they are fully closed before washing. Preferably place the garment in a laundry bag. Do not use any cleaning products.

Made in France

Adverse effects & allergies: No cases to our knowledge.
Recycling & disposal: To our knowledge, the materials used in the manufacture of this item present no particular harmfulness; this garment may be disposed of or recycled in accordance with good practice.

EN ISO 13688 : 2013
EN ISO 11612 : 2015

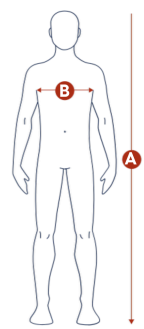

EN ISO 11612

A1 B2 C2 F2

A1 - Limited flame spread (surface ignition)
B2 - Convective heat (Level 1 to 3)
C2 - Radiant heat (Level 1 to 4)
F2 - Contact heat (Level 1 to 3)

Year of manufacture: see label

It is advisable not to store this PPE for more than one year, as a deterioration in quality is always possible, which could possibly alter the level of protection.
