ISOWARM
QUALITY PROTECTION FOR HOT WORK

Preox Kevlar Trousers Standard

Glass Industry - Industrial Maintenance

REF: DLP10/2XX/XX
(2XX = model, XX = size)

VERSION 10/2026

This PPE complies with Regulation (EU) 2016/425 and has been granted EU type-examination certificate no. CER26/03/0023.C1 issued by TTS- Total Testing Services srl, European notified body 2959.
This PPE is verified by the MODULE D audit carried out by Quintin Certifications, European notified body 2927. EU Declaration of Conformity: available for download on our website: www.dl-equipement.fr

Instructions and precautions for use:
These work trousers, made of preox Kevlar fabric with a 100% cotton loop lining treated with Proban, are designed to be worn when approaching areas of significant heat.
Each time the dlp10/2xx/xx trousers are used, check that they are neither torn nor dirty, as tears or soiling may reduce their protective performance. This garment must always be worn fully closed and together with the dlv10/2xx/xx jacket to ensure identical protection of the body. The braces must be covered by the dlv10/2xx/xx jacket.
The trousers must always be worn with a jacket offering at least the same performance according to EN ISO 11612

Protection limits:
The protection is identical over the entire surface of the garment.
These trousers are not suitable for work areas where there is a risk of molten material splashes; in that case it is essential to use a garment made of aluminised fabric in order to ensure protection suited to the risks.
The flame-retardant treatment of the lining is guaranteed provided the recommended washing instructions are followed. In the event of an accidental splash of molten material or of a chemical or flammable liquid, the wearer must remove the trousers and make sure that the liquids have not come into contact with the skin. The trousers must then be cleaned or withdrawn from service.
Warning: In the event of a splash or spatter of molten metal, the user must leave the work area immediately and remove the garment concerned. Caution: if the garment is worn directly against the skin, it may not entirely eliminate the risk of burns.

Packaging & storage:
Item delivered in a shipping carton without other packaging (no specific packaging required). Recommended storage in a dry & clean place, away from light, in order to maintain the level of protection corresponding to the tests carried out.

Made in France

Care, cleaning:
Domestic washing according to ISO 6330; the washing temperature must not exceed 40°C.
Do not bleach - Do not tumble dry - Iron at 150°C (2 dots) - Do not dry clean
DL Equipement SARL is the only company authorised to repair the dlp10/2xx/xx trousers, in order to guarantee the use of the materials certified in the conformity file.
If the garment has hook-and-loop fasteners, make sure they are fully closed before washing. Preferably place the garment in a laundry bag. Do not use any cleaning products.

Recycling & disposal: To our knowledge, the materials used to manufacture this item present no particular hazard. Disposal or recycling of this garment can therefore be carried out in accordance with good practice and local regulations.

EN ISO 13688 : 2013 + A1 :2021
EN ISO 11612 : 2015

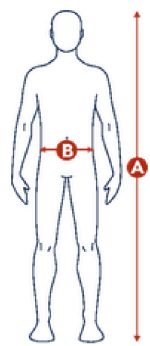

EN ISO 11612

A1 A2 B3 C3 F2

A1 - Limited flame spread (surface ignition)
A2 - Limited flame spread (edge ignition)
B3 - Convective heat (Level 1 to 3)
C3 - Radiant heat (Level 1 to 4)
F2 - Contact heat (Level 1 to 3)

Date of manufacture: on label (YEAR_MONTH_XXXX.(XXXX=traceability tracking)

Use-by limit: do not exceed 10 years.
/!\ Provided that the instructions for use and storage are followed.
